Is Microsoft Chat a part of NetMeeting or a separate application.

It is not part of NetMeeting. AFAIK it is not available anymore (and hasn't been for a while).

I just wonder since Microsoft want to try their hands at every aspect of PC, why they discontinued Microsoft Chat. If it was bundled with the Windows OS it would be better for people using chat.

I do have to say though that Microsoft Chat is still a very popular program with some – including me

here is a link to some Microsoft Chat resources
