Hi Chris --

I am not familiar with the verisign test cert -- you may want to review the
whitepaper "Obtaining and Installing a VeriSign WLAN Server Certificate for
PEAP-MS-CHAP v2 Wireless Authentication" at
<http://www.microsoft.com/downloads/details.aspx?FamilyID=1971d43c-d2d9-408d-bd97-139afc60996b&DisplayLang=en>.

This whitepaper has been updated recently.

Also you may want to verify that the Verisign test cert meets the minimum
server certificate requirements found in "Network access authentication
and certificates" in Windows Server 2003 IAS or VPN Help, or on the web at
http://www.microsoft.com/resources/documentation/WindowsServ/2003/standard/proddocs/en-us/Default.asp?url=/resources/documentation/WindowsServ/2003/standard/proddocs/en-us/sag_VPN_und15.asp
