OK, sorry to reply to my own post, but I've solved this.  
Here's the script...

```
do shell script "/Users/Charles/bin/sig.sh"  
tell application "Microsoft Entourage"  
tell application "System Events"  
tell process "Microsoft Entourage"  
click menu item "Paste" of menu "Edit" of menu bar item "Edit"  
of menu bar 1  
end tell  
end tell  
end tell
```

.
