another dumb question: i use entourage 2004, osx 10.4.5, mac powerbookg4 1.33mhz chip, 60GB HD, 512 MB Ram.

when i print email messages from entourage, the header is in obscenely large type – like 16 points. i usually view my messages in 14 point type so as not to strain the eyes, but the print option is set to 9 point type for messages. any idea what i can do to bring the headers down to the same size as the text? in eudora this was not a problem. thanks – peter
