I'm hoping someone can help me with this. I've been using Entourage for years, have downloaded the most recent updates and for some reason, I can't get messages with attachments to go through no matter what size the file is. This just started happening a few weeks ago and is only happening with pdfs, jpegs, and stuffed files. Word docs seem to be fine.

What happens when you try? Do you get an error message?

What encoding are you using? I recommend using "Encode for Windows (MIME/Base64)" in almost all cases.
