It never used to do this, but at computer startup, Entourage opens up. How do I turn it off?
I have checked in the preferences and didn't see anything that would help. I also tried the "help" with no luck.
Where do I get this thing turned off? Thanks.

Thanks, Adam.

I checked and I don't have it selected to start at login. It still comes up on computer restart. Anywhere else I should look?

Brad
