Whenever i try to paste a chart into word, im getting the following EXCEL (not WORD) error message:

Excel: Sept-May\_2.6.xlsx is already open.Reopening will cause any changes you made to be discarded. Do you want to reopen Sept-May\_2.6.xlsx? OK

I click OK and nothing happens. I close the file. Make sure no other files are open. Reopen the excel file. Try again, and boom -- same message.

.
