Operating System: Mac OS X 10.5 (Leopard)

Processor: Power PC

Even on the default presentation, the first line of bulleted text always hangs slightly to the left. How can I align the whole paragraph?

If I turn off the bullet, it's easy to move the indent marker to move lines 2-on but not with the bullet.

I've read there are two parts to the bottom marker, as it appears to be, but I have found any way to move them independently. What's the secret?

Thanks

.
