Well, you're in the Mac Word group, so you might want to post to one for PC Word:

<http://www.microsoft.com/office/community/en-us/FlyoutOverview.aspx>

Even though the answer may be the same on the Mac you really don't provide enough detail about what you are actually trying to accomplish – what you've expressed can be achieved in several different ways & may not even be necessary based on the availability of other features. Be as accurate & specific as you can in describing your need when you post over there:–)
