- 

I am currently using Office X (v.10.1.6) on my G4 PowerMac ( the only mac in the office). The PC's in the office are being upgraded to Microsoft Office 2003. Will I have to upgrade my mac to Office 2004 or will I still be able to read and edit any Word, Excel or Powerpoint files I receive from any of the PC's with my existing Office X?

thanks for the help!

ELL
