Hi, "Class Not Registered" or Error 80040154 can have a few different solutions depending on what are you doing in WMP at the time you get it.

Q: Do you get this while trying to play an AVI?

Is so... You most likely don't have the right codec installed for that specific AVI or you have a bad install of the codec.

- Download and use GSpot (<http://tinyurl.com/328cp>)
 - Find out the 4CC code for the file codec
 - <http://tinyurl.com/262go> will help you.
- (Or post the information back here and I can help)

Q: Do you get this while playing a file other than an AVI?

If so... <http://tinyurl.com/yu649> will help you out.
