Please do not give anyone this advice any longer. Due to multiple versions of players and SDKs floating about, if you uninstall and reinstall your box is actually probably going to get into an unknown state. I realize it's easy advice, but it's not relevant to WMP10, and possibly very bad advice, if well-meant. =\

--

(speaking for myself and doing this in my free time)

See <http://zachd.com/pss/pss.html> for some helpful WMP info.

This posting is provided "AS IS" with no warranties, and confers no rights.

Now Playing: "Thinking About You" by "Radiohead" in WMP10.
