My WMP has been able to rip CD's however, I can't burn. I'll receive an error message stating "Interface not recognized." Any help would be GREATLY appreciated.

"Recognized" or "Registered". What is the error number.

Thanks!
Melissa

BTW, If I were to remove & then reinstall my WMP, my music would still be stored in my shared folder right?

No. I haven't heard of any software deleting data files when uninstalled. On the other hand I haven't met anyone immune from the need for an offline backup.

.
