That's actually pretty interesting. You're getting the Access Denied error too. Do you have full access to HKEY_CLASSES_ROOT\WMPlayer.OCX, EditFlags? You should be able to run a registry fixup tool such as scanreg.exe to fix this up. This would have been caused by bad security lockdown software...
=\

Sorry for the large amount of text, but I figured you could find what you were looking for better if I just sent the whole thing.
It may be for several install attempts. All lines from 4/24/06 to end of file.
Thanks for your assistance...
