Does my Song Signature plug-in show the right data.... ?
This sounds like a bug in the Messenger plug-in code... I haven't seen that myself.

Another one:
When (Live) Messenger uses it's plugin in WMP11 to show the currently playing track. If an error occurs in the player (the track cannot be played, etc.), the player skips to the next track in the list. However the Messenger message doesn't change accordingly - it shows the faulty track name until another one starts.
Thanks.
