Yes and no. I did it a long time ago and it worked fine, but re-installed again today because of the burning device issue.

I always had DLA, so don't see why this would suddenly be a problem. I have tried to delete DVD ram, but it still doesn't work. This is all so very odd.

"Mike Poz [MSFT]" wrote:

Yes, DVD-RAM support is the original "Direct to Disc" implementation and is usually tied to your burner drive, not all burners support DVD-RAM.

<http://en.wikipedia.org/wiki/DVD-RAM> (From the Introduction section: DVD-RAMs can be accessed just like a hard or floppy disk and usually without any special software.)

It appears that DLA is the newest acronym for Roxio's "Direct to Disc"

RE: Two problems: license and burning

implementation.

<http://www.roxio.com/enu/products/dla/overview.html>

Going to have to update my library of what they're calling it.

"KHL" wrote:

Don't have this direct to disc. But there
seems to be a lot of disc-software
on the computer. Stuff called DLA from
sonic, DVD ram and so on. Anything
else you know can cause problems?

"Mike Poz [MSFT]" wrote:

Your inability to burn
DRM'd content is related to
the fact that Media Player
cannot see the burner.

Take care of the "Direct to
Disc" part of Sonic (disable
or uninstall only
that part of Sonic's burning
software) and you should
find that you can burn
your files again.

"KHL" wrote:

This is what
I find very

RE: Two problems: license and burning

weird,
because
when I go
to the
properties
in Media
Player it
says that
I'm allowed
to play and
burn and so
on for as
many times
as I want.
When I go
to
properties
from the
music
folder it
says
protected
contents.

I don't get
it. But then
again since
Media
Player can't
find the
burning
device, I
don't know
if I can burn
in Media
Player –
just know I
can't burn
in Media
Center
anymore.

The
music
tracks
that

RE: Two problems: license and burning

won't
burn,
if
you
right
click
them
in
Media
Player
and
select
properties,
you'll
get
a
dialog
with
a
number
of
tabs.
One
of
the
tabs
says
"Media
Usage
Rights".

If
you
don't
have
permissions
to
burn,
that
tab
will
have
the
text:

This
file
cannot
be
burned.

RE: Two problems: license and burning

RE: Two problems: license and burning

This
probably
means
that
you
didn't
purchase
the
track
or
that
where
ever
you
got
it
from,
it
didn't
come
with
burn
rights.

Thanks
for

RE: Two problems: license and burning

the
answer.
I
have
always
had
Sonic
installed
on
the
comp.,
but
I
will
look
more
into
that
later
(off
to
work
now).

There
is
no
problem
with
playing
the
music
files,
only
burning
them
in
Media
Center.
Can
burn
them
in
other
programs
though.
I
have
tried
to
play

RE: Two problems: license and burning

songs
and
then
burn
them,
but
it
will
not.
Just
tells
me
the
files
are
protected
by
a
license.
I
have
burned
them
before
in
Media
Center
and
have
not
re-installed
or
anything.

"Mike
Poz

wrote:

If
WMP
cannot
see
your
burner,
it's
likely
that
you
have

RE: Two problems: license and burning

Roxio/Sonic's
"Direct
to
Disc"
or
Nero's
"InCD"
installed
on
your
computer.
Both
of
these
prevent
WMP
from
seeing
the
burner
drive
as
they
tell
the
operating
system
to
treat
the
discs
like
hard
drives.

Disabling
or
uninstalling
the
offending
component
usually
resolves
that
issue.

Your
WMA
files
may
have

RE: Two problems: license and burning

been
ripped
with
copy
protection
enabled.
Your
best
option
is
to
re-rip
the
files
without
copy
protection
enabled
(Tools
->
Options,
Rip
tab,
"Copy
protect
music"
checkbox).

If
you
cannot
then
you
have
to
play
the
content
to
force
a
re-licensing
of
the
content.
Typically
this
is
a
problem
if

RE: Two problems: license and burning

you
have
a
new
computer,
or
if
you've
done
a
clean
install
of
your
operating
system
and
copied
the
files
back
onto
the
computer.

Playing
the
content
should
make
a
webpage
appear
going
to
a
Microsoft
website
that
will
restore
the
licenses.

Thanks!

For
some
reason,
Media
Player
suddenly
won't
recognise
I
have
a
burning
device.
Other
programs
burn
fine,
but
Media
Player
just
tells
me
to
plug
in
a
burning
device.
Any
thoughts?

And

RE: Two problems: license and burning

also,
Media
Center
(not
player)
won't
burn
the
wma-files,
but
only
the
mp3-files,
because
of
a
license
problem.
I
must
say
that
I
have
burned
the
very
same
files
before
and
all
the
songs
are
from
my
own
ripped
cd's.
Any
more
thoughts?
