It's your system, so I don't know what's on it. What's installed to it? Is Ac3filter.ax on your system? It's being installed to different names now, which is cute.

If you installed any codec pack ever, all bets are kind of off.

Can you recommend a way to find out what harmful junk might be on my system? Thanks.

<za...@xx> wrote:

That should have utterly nothing to do with WMV9 VCM.

I would suspect you installed AC3 Filter or some other garbage that's hijacking audio output...

Re: Error with Windows Media Video 9 codec

WMP version 10.00.00.4058.
Windows XP Home Edition Version 5.1

I don't know what you mean by "current scope," but the key is that some videos (notably the videos on mlb.com) only play with sound in Zoom Player, not in WMP.

Thanks.

<za...@xx> wrote:

Problems with MPG files should be unrelated to this. The WMV9 VCM wouldn't affect WMP7 or newer.

What is the current scope of your problem set on what version of Windows using what exact version of Windows Media Player... ?

Re: Error with Windows Media Video 9 codec

I've had trouble with some
but not all wmv and mpg
files.

Sorry for the delay in my
response.

Re: Error with Windows Media Video 9 codec

When
I
try
regscr32
wmv9vcm.dll,
I
get
the
following
error
message:

"wmv9vcm.dll
was
loaded,
but
the
DllRegisterServer
entry
point
was
not
found.
This
file
can
not
(sic)
be
registered."

Audio
codecs
for
files
playing
without
sound
include
WmPlug
and
Windows
Media
Audio
9.1.
