I am logged in as "me" and I am the admin. Do I have to do something different?

When I get my prompt, am I typing the exact words you have?

Open cmd.exe As An Administrator. If you don't open it As Administrator this won't work.

Run:
unregmp2.exe /UpdateWMPVersion
in the prompt that you get. Voila.

Did this ever get resolved? I have the same problem except it says
11.0.6000.6336 is where 11.0.6000.6344 was expected.
Please help!!!!

What happens if you run:
sfc /scannow
from a cmd.exe opened with Administrative
privileges?
