>

copy the mp3 files to a folder, highlight the contents of the folder and  
choose send to (your cd drive), it should then ask you if you want to burn a  
data (mp3) or music (cda) disc. Choose music (cda).

To copy the mp3 files if you need to as wma, choose tools>options>rip music  
in windows media player and from the drop down list choose wma. Then rip the  
tracks.

.
