I work with lessons on-line I will want myself to see a sample of my work this in this address,

<http://www.atualizemed.com.br/aula2/index.htm>

I use following script of embedding player in the web page

```
<object
id="VPlay"
name="VPlay"
width="240"
height="160"
type="application/x-oleobject"
classid="CLSID:22D6F312-B0F6-11D0-94AB-0080C74C7E95">
<param name="AnimationAtStart" value="0" />
<param name="AutoStart" value="0" />
<param name="CurrentMarker" value="0" />
<param name="EnablePositionControls" value="0" />
<param name="EnableTracker" value="0" />
<param name="ShowAudioControls" value="0" />
<param name="ShowCaptioning" value="0" />
<param name="ShowControls" value="0" />
<param name="ShowDisplay" value="0" />
<param name="ShowGotoBar" value="0" />
<param name="ShowPositionControls" value="0" />
<param name="ShowStatusBar" value="0" />
<param name="ShowTracker" value="0" />
<param name="SRC" value="video.wmv" />
<param name="TransparentAtStart" value="1" />
<!-- <param name="Volume" value="-600"> -->
<embed>
src="video.wmv"
width="240"
height="160"
autostart="0"
type="application/x-mpayer2"
id="VPlay"
name="VPlay"
```

Re: to diminish the time of delay

```
showdisplay="0"  
showcontrols="0"  
animationatstart="0"  
transparentatstart="1"  
showstatusbar="0"  
showtracker="0"  
currentmarker="0"  
enablepositioncontrols="0"  
enabletracker="0"  
showcaptioning="0"  
showaudiocontrols="0"  
showgotobar="0"  
volume="-600"  
showpositioncontrols="0">  
</embed>  
</object>
```

I use following script to synchronize the video with slide show and to advance or playback slides

```
if ((x=findObj('VPlay'))!=null)  
var vidRef = x  
  
var VDState = 0  
var VDEnd = 0  
var VDNS = 0  
  
var VDCurrent  
var VDDuration  
var VDSlide_Old  
var NVDCurrent  
  
document.title = "Palestra - " + VDTitulo  
  
VITitulo.innerHTML = VDTitulo  
VIAutor.innerHTML = VDAutor  
VITime.innerHTML = VDTempoFinal  
VISlides.innerHTML = VDNS + "/" + (Number(VDSlides.length)-1)  
  
function mPlay(){  
document.all.DInfo.style.visibility = 'hidden'  
  
if ((x=findObj('DVideo'))!=null)  
x.style.visibility = 'visible'  
  
if(VDState == 1){  
mPause()  
}  
else{  
vidRef.Play();  
swapImage('bt2','../images/pause.jpg',1)
```

Re: to diminish the time of delay

Re: to diminish the time of delay

```
VDDState = 1
VDDDuration = vidRef.Duration
CKPosition()
}
}

function mStop(){
vidRef.Stop();
VDDState = 0
swapImage('bt2','../images/play.jpg',1)
document.all.DInfo.style.visibility = 'visible'

if ((x=findObj('DVideo'))!=null)
x.style.visibility = 'hidden'

vidRef.CurrentPosition = 0;
}

function mPause(){
swapImage('bt2','../images/play.jpg',1)
vidRef.Pause();
VDDState = 2
}

function CKPosition(){
VDCurrent = vidRef.CurrentPosition

CKSlide()
setTimeout('CKPosition()',500);
}

function CKSlide() {
NVDCurrent = VDCurrent.toString()

if (NVDCurrent.indexOf(".") != -1) NVDCurrent = NVDCurrent.substr(0,
NVDCurrent.indexOf("."))

t = NVDCurrent
s = t%60
m = (t-s)/60

if (s < 10) s = "0"+s
if (m < 10) m = "0"+m
if (m+":."+s >= VDTempoFinal){
VDEnd = 1
mStop()
mQuest()
}

VTime.innerHTML = m + ":" + s
VISlides.innerHTML = VDNS + "/" + (Number(VDSlides.length)-1)
```

Re: to diminish the time of delay

Re: to diminish the time of delay

```
if (NVDCurrent != VDSlide_Old){
for (ns=1;ns<VDSlides.length;ns++){
if ((Number(NVDCurrent) == (Number(VDTimeDiff) + Number(VDSlides[ns])))
&& (ns != 0)){
swapImage('VSlide','slides/img' + ns + '.jpg',1)
VDSlide_Old = NVDCurrent
VDNS = ns
}
}
}
}
```

```
function FetchSlide(way) {
nx_slide = eval("VDNS" + way + "1");
```

```
if(nx_slide > VDSlides.length) {
nx_slide = VDSlides.length - 2;
} else if(nx_slide < 0) {
nx_slide = 0;
}
```

```
GoToSlide(nx_slide)
}
```

```
function GoToSlide(slide_id) {
try {
vidRef.CurrentPosition = VDSlides[slide_id];
VDState = 0;
mPlay();
} catch(e) {
alert("Erro ao encontrar o slide solicitado.")
}
}
```

This is mime types configure em IIS (windows 2003 server)

File extension MIME type

```
..asf video/x-ms-asf
..asx video/x-ms-asf
..wma audio/x-ms-wma
..wax audio/x-ms-wax
..wmv video/x-ms-wmv
..wvx video/x-ms-wvx
..wm video/x-ms-wm
..wmx video/x-ms-wmx
..wmz application/x-ms-wmz
..wmd application/x-ms-wmd
```

I wait to be able to have shown what it occurs and pardons me the English, my native language is the Portuguese.

Could you clarify what exactly are you doing? A working sample would be good.

If mms:// is pointing to an IIS or Apache server, no benefit would be gained. If you could provide an actual working URL or sample, that would be most effective.

Kind regards,
-Zach

Debtor for the attention, was valuable its indication, really has much good thing in this site. But what he happens and that exactly, calling for the protocol mms: // the problem continues. What I can make to speed up the processing of the heading of the file? where they are indexes and the marks.

In the example below, the content is coming from an HTTP server, and thus it is not optimized for seeking and other "trick" functionality. If you put this content upon a Windows Media Server, you should then be able to instantly seek / fast-forward.

I have a question to make for the staff most experienced of forum and wait to be able to get a result. I have a video of a HTML page , the codified video this with stream, index and marks.

What it occurs and that the functions To fast-forward and fast rewind so after function to have passed the time of 4 minutes. I do not obtain to understand the reason, simply in these 4 minutes initial the buttons to fast forward and to fast rewind they do not function and also not me of the

acknowledgment of error, after this time they function very well. In the audio version alone of the functions to fast forward and to fast rewind they function immediately and alone this when I call the video to standalone player does not happen the same thing fast-forward and to fast rewind they only function after 4 minutes passed the video Somebody can say me as makes to correct this, as poso to diminish this open assembly time? The housed video this in a server Windows 2003 Any aid and very well coming

Re: to diminish the time of delay

Dimitris

The code of embedded player in the page
and the following one

```
<object
id="VPlay"
name="VPlay"
width="240"
height="160"
type="application/x-oleobject"
classid="CLSID:22D6F312-B0F6-11D0-94AB-0080C74C7E95">
<param name="AnimationAtStart"
value="0" />
<param name="AutoStart" value="0" />
<param name="CurrentMarker" value="0"
/>
<param name="EnablePositionControls"
value="0" />
<param name="EnableTracker" value="0"
/>
<param name="ShowAudioControls"
value="0" />
<param name="ShowCaptioning" value="0"
/>
<param name="ShowControls" value="0" />
<param name="ShowDisplay" value="0" />
<param name="ShowGotoBar" value="0" />
<param name="ShowPositionControls"
value="0" />
<param name="ShowStatusBar" value="0"
/>
<param name="ShowTracker" value="0" />
<param name="SRC" value="video.wmv"
/>
<param name="TransparentAtStart"
value="1" />
<!-- <param name="Volume"
value="-600"> -->
<embed>
src="video.wmv"
width="240"
height="160"
autostart="0"
type="application/x-mplayer2"
id="VPlay"
name="VPlay"
showdisplay="0"
showcontrols="0"
animationatstart="0"
transparentatstart="1"
showstatusbar="0"
```

Re: to diminish the time of delay

```
showtracker="0"
