This guide is mainly about how to use limewire to download free music and video to computer, and then transfer limewire free music and video to iPod Touch and iPhone.

It will include three parts as follow:

1. How to download free limewire video and music to computer?
2. How to put limewire free movie to iPod Touch?
3. How to import limewire free movie to iPhone?

You can download limewire software free from its official site:

'Lime Wire Official Website & Free Download, BitTorrent '

(<http://www.limeware.com>)

If you want to download youtube video to iPod, Zune, PSP, you can refer to this step by step guide:

'Free YouTube download Guide – download YouTube to iPod, YouTube downloader, convert YouTube to Zune' (<http://tinyurl.com/6e82cd>)

If you want to rip DVD movie to iPod or iPhone, you may take a look at this step by step guide

'How to Copy DVD to iPod, edit DVD movie for iPod and put DVD movie on iPod'

(<http://www.aimersoft.com/tutorial/dvd-to-ipod-converter.html#114>)

Part1. How to download free limewire video and music to computer?

1. Download Limewire, it's totally free.

'Lime Wire Download LimeWire'

(<http://www.limewire.com/download/version.php>)

2. Run the Limewire, Just type in some words that you may be interested in, choose the type, and press search, then you can get a lot of files to download.

3. After conversion finished, use iTunes to transfer video to iPod Touch:

- 1). Open iTunes and click 'File' to add your videos to iTunes library.
- 2). plug in your iPod Touch to computer, then iTunes will detect your iPod Touch as a device.
- 3). Select your iPod device on the left panel of iTunes, click 'Movies' tab, check the videos you want to sync and click 'Apply', done.

If you do not want to use iTunes to add video, you can use the 'free iPod Copy Manager' (<http://www.aimersoft.com/ipod-copy-manager.html>) provides by Aimersoft iPod Video Converter; it can help you transfer the converted video to iPod directly without iTunes (The iPod Manager supports only iPod Video now, but it will be upgraded soon, then it will supports iPod Touch, iPod Nano and iPod Classic). Just connect your iPod to computer, click 'Tools' –> 'iPod Copy Manager', then

How to download limewire video to iPod Touch and iPhone

you will see a pop up window, the left pane is the video and music list on your computer, the right pane is the file list on your iPod Video (you also can copy files from iPod to computer, it's useful when your computer crashes or you lose iTunes library), select the files you want to sync and click the right arrow button to finish the transfer.

If you are Mac OS X user, you can use Aimersoft Mac Video Converter to convert limewire video to mp4 video for iPod Touch: 'Aimersoft Video Converter for Mac' Mac Video Converter, Mac AVI/MP4 Converter for Leopard' (<http://www.aimersoft.com/mac-video-converter.html>)

If you want to rip DVD to mp4 video for iPod Touch, iPod Nano, iPod Classic and iPod Video, you can take a look at this step by step guide:

'How to Copy DVD to iPod, edit DVD movie for iPod and put DVD movie on iPod'

(<http://www.aimersoft.com/tutorial/dvd-to-ipod-converter.html#114>)

Part3. How to transfer limewire free movie to iPhone?

iPhone can play MP4 and H.264 video, when you finished download limewire videos, you have to convert them to the right format, Aimersoft iPhone Video Converter can help you do that, just follow these steps:

1. Download and install Aimersoft iPhone Video Converter, you can free download the latest version from here:

'Aimersoft iPhone Video Converter' iPhone MP4 Movie Converter' (<http://www.aimersoft.com/iphone-video-converter.html#114>)

2. Run Aimersoft iPhone Video Converter, click 'Add' button to import your downloaded limewire video, then click 'Start' to start the conversion, the default setting works perfect.

3. Open iTunes, find your converted video on your hard drive, and drag the video to your iTunes library, or click iTunes 'File > Add File to Library' and import your video to iTunes. Connect your iPhone to computer via USB cable, when your iPhone is detected by iTunes, iTunes will sync the video to iPhone automatically, done.
