Hi,

Have anyone tried inserting page break when there are no paragraphs on the page ?

Well I have two TextBox and one Picture object and when i try to insert page break it happens not exactly where I have expected it . I would expect or need it after the last inserted object

I don't even know what to set for Range

```
object range = aDoc.Range(ref s1,ref s2);
```

```
object start = Word.WdSectionStart.wdSectionNewPage;
```

```
aDoc.Sections.Add(ref range, ref start);
```

Thanks.

Kris
