October 16, 2004 – Afalina Co., Ltd. announces a new version of Add-in Express .NET, a True RAD tool for .NET that allows you to integrate your solutions within the top most popular end-user applications.

Add-in Express .NET Edition is developed in C# and directly supports Delphi 8 for .NET, Visual C++, C#, Visual Basic .NET, and Visual J#. Add-in Express provides for add-in and smart tag developers the True RAD way and allows you to develop your add-ins and smart tags via a couple of clicks.

Add-in Express supports COM add-ins for 9 well-known MS applications:

- * Access 2000 and higher
- * FrontPage 2000 and higher
- * Word 2000 and higher
- * MapPoint 2002 and higher
- * Outlook 2000 and higher
- * PowerPoint 2000 and higher
- * Project 2000 and higher
- * Visio 2002 and higher
- * Excel 2000 and higher

Smart Tags are supported for:

- * Word 2002 and higher
- * Excel 2002 and higher
- * PowerPoint 2003 and higher

RTD Servers work on Excel 2002 and higher.
