Alvin,

I have looked at this article and it does not seem to help me.

This is what I am doing:

```
// Add the dates to the array
rgDates.Add(SqlData.GetDateTime(idxDate));
```

```
// Set the dates
Series.SetData(ChartDimensionsEnum.chDimCategories,
(int)ChartSpecialDataSourcesEnum.chDataLiteral,
rgDates.ToArray());
```

```
DateAxis.HasTitle = true;
DateAxis.NumberFormat = "MM/YYYY"
```

```
DateAxis.GroupingType = ChartAxisGroupingEnum.chAxisGroupingNone;
// DateAxis.GroupingType = ChartAxisGroupingEnum.chAxisGroupingAuto;
```

If I comment out the `chAxisGroupingNone` line and uncomment the line below then the date formatting works and I have no idea why!

Ian

Alvin,

Do you mean this article:

Subject: How to display text in the format hh:mm for a category label?

Thanks

Alvin,

Thanks for the reply. Unfortunately I have not managed to find the article that illustrates the workaround. Could you please give me the details on the link?

Thanks

I am using OWC10 for creating a chart in
ASP.NET. I am suing data read
from
a SQL Database and I am creating a Y axis
and an X axis. The graph is
displaying data read at a number of different
dates over a date range. The

x

Re: NumberFormat for dates not working

axis is displaying the dates.

The problem I am having is that the date format is always MM/DD/YYYY regardless of how the NumberFormat is set i.e. dates are always in US format.

I have noticed that if I set the enumeration to either auto or manual the dates show in the correct format but the graph is wrong. If I set it to NumberFormatEnum.None then the graph is correct but the date format is wrong.

Does anyone know what I am doing wrong or is there a bug in setting the NumberFormat?
