1) Please learn how to post to newsgroups – it is customary to start a new thread *NOT* attach your query to someone else's.

2) That notwithstanding, you may *NOT* install Office XP Small Business Edition on your new computer – it is OEM and, as such is tied forever to your old system and may *NOT* be installed on any other.

The OEM limitations are as follows: –

- Tied to original hardware
- Vendor-only support
- Non-transferable (unless original hardware is also transferred).

3) "The box of office xp small business ed. says that power point is on the disk... We installed this already on our previous computer and power point was there..."

microsoft.public.office.misc: Re: office xp 2002 small business edition installation

Really?! If that's the case, then you should advertise your old computer on eBay – and I'd love to see a scan of that box! – you'd make enough to retire! Office XP SBE does **NOT** contain PowerPoint – never has. You may have had PowerPoint on your old system, but it was nothing whatsoever to do with the SBE.
