See <http://support.microsoft.com/?kbid=203078> "Office Shortcut Bar (OSB) setup, startup, and exit behavior is different from earlier versions of Office".

cmxl wrote:

I want my OSB to stay always on top, and come up right away on Start. Did it OK for awhile when PC was new, now it has to be coaxed out of hiding by clicking on a desktop shortcut to Start/Programs/Microsoft Office Tools/Microsoft Office Toolbar.

I have it configured Customize/View/ with checks on Show Tooltips, Always on Top, and Auto Fit into Title Bar area. I see I also have checks on Animate Toolbars, Sound and Show Title Screen at Startup, don't see any utility to them, I'm going to uncheck them and restart pc as soon as I've posted this, will post a 'never mind' immediately if it helps! Thanks in advance!

BTW, I have Office 2000 and win xp pro.
