Thanks Bob I,

Now that I've gotten past my embarrassment ... another question. I want to install my Office Pro in 2 desktops ... one will be taken down for a period of time and become my main unit later. The other is new unit bought as a back-up. Is there an option during the set-up sequence that allows me to purchase a license extension (or a number to call to do this) to allow me to do what I've described?

ps. I'm also a retired community college teacher, but I did not buy Office Pro at an academic outlet. Any way this allows me to do the two installs within the eula?
