||
|| After furious head scratching, kermor asked:
||
|| Thank you... In fact my MSO particularly my Outlook can't be
|| updated;
|| I have some problems related to lost registry I believe. I.e. my
|| menu
|| missed "File" starting with edit instead! The
|| best way is to remove everything and start with a fresh copy and
|| do my update....
|| I went to Windows search and could not find my .pst file! I went
|| under all files and folders and nothing came out!!!
|| You said that removing MSO will keep intact my personal folders, my
|| contacts folder and calendar somewhere... I'm sure you're right
|| but I
|| want to play
|| safe with those files and save it on my desktop, I can't
|| take the
|| risk to loose all of them...
|| Reinstalling MSO meaning Outlook, what should I do to bring back
|| into
|| my
|| e-mail program those files the same way I left them?
|| Thank you again for your help.
||
||
|| You will never lose data created in Microsoft Office if you
|| uninstall and reinstall.
||
|| However, having said that, save your .pst file (use Windows search
|| and enable searching hidden files) to a safe location.
||

Re: Reinstall MSO: how can I prevent to loose my Personal Folders

|||| First, however, you might want to post why you think your Office
|||| 2003 installation is infected. Simply removing it and
|||| reinstalling will not remove any infection. That requires an AV
|||| product – you can use House Call from Trend Micro to check your
|||| system. Then you should get an AV program, one free one that
|||| works well is from <http://www.grisoft.com>.

||||

|||| After furious head scratching, kermor asked:

||||

|||| My MSO 03 is infected. I want to reinstall my MS Office 03: how
|||| can I prevent to loose my:

|||| –Personal Folders and

|||| –My Contacts Folder and or my Addresses Folder and

|||| –My Calendar Folder.

|||| Thank you for your prompt reply....
