Patrick, going forward to step two, in this steck I get the error. This installation package could not be opened. Verify that the package exists. When I get this error is with any file that has .msi and is associated with microsoft office 2007. It seems I'm not getting anywhere in removing the 2007 beta.

Patrick or anyone else, I tried using the RTM instructions below and all other links to resolve my problem, but still won't work. When I try to remove any of the beta 2007 programs, I keep getting: This product has been corrupted. Run setup again from the cd, dvd, or other original installation source. Used other links, <http://support.microsoft.com/kb/928218/en-us>. Can someone help me in removing beta completely so I can go back to office 2003?

I paid the nominal fee and downloaded the Office 2007 beta 2. The trial period ended today. I uninstalled from the control panel. The error message said I have a corrupt install and need to use the original CD to uninstall. Since I downloaded from Microsoft website I don't have the CD. I purchased the full upgrade but it will not upgrade over the trial beta version.
