

Re: Picture Manager tools not working

|| Expand Office Tools, and set Microsoft Office Picture Manager to Not Available.

||

|| Click Continue, and follow the prompts to complete removing MOPM.

||

|| Reboot. The repeat the procedure, setting MOPM to Run from My Computer.

||

|| Cross your fingers. And see if it works now.

||

|| If it does... be alert for the possibility that installation might've screwed up other components as well. If it were my computer and discovered other screwed-up components, I would completely remove SBE, reboot, and reinstall. (Windows will remember your activation information --- at least it does here.)

|| Yes, I'm running Vista. The search came back with

|| 2007 Microsoft Office System

|| 2007 Microsoft Office Primary Interop Assemblies

|| Microsoft Office Small Business Connectivity components

||

|| I searched for Picture Manager, Office Professional, trial version,

|| and other

|| combinations of terms with no results returned. I'm not having

|| much luck with the uninstall of the trial version. What should I

|| try next?

||

||

||| Since yours is a new computer, would I be correct in assuming that

||| you're running Vista? If so, in Control Panel > Programs and

||| Features, type "office" into the Search box at the top right

||| corner. There should be distinct listings for each major Office

||| version or independent Office application that's installed. Here,

||| for example, I have (among others):

|||

||| Microsoft Office Professional Edition 2003

|||

||| Microsoft Office Ultimate 2007

|||

||| Sometimes the names are hard to see, so you might want to expand

Re: Picture Manager tools not working

||| the Name field at the top so you can see the entire name. If my
||| "theory" is correct,
||| you very likely have two copies of Picture Manager installed, and
||| you're trying to run the one from the trial version of Office.

||| I looked for a listing for the trial version of professional and
||| could not
||| find it. I uninstalled Access, which is in the trial version, and
||| that didn't
||| work. I went to Remove programs and couldn't find anything even
||| after going
||| through the listing of every option to install or uninstall. How
||| do I uninstall the trial version of office pro?

||| Thanks,

||| Patti

|||

||| "Herb Tyson [MVP]" wrote:

|||

||| You need to completely uninstall the trial version of Office
||| Professional.

||| Then you should be able to install (if they're missing) the
||| missing components from Small Business Edition.

|||
