You should have burned the file to a CD for safe keeping.  
The download site is no longer available.

I participated in the power together program and received the free copy of office 2007 pro. I recently reformatted and went to download the program from <http://www.officepro2007download.com/> and to my dismay they page displays an error. Does anyone know where I can download this file? I am not asking for a key ( I have one) I just need the exe that was downloaded. Thanks

.
