Is there a way I can modify Office XP application (Excel, Word, etc.) Save As Dialog Box to include an icon pointing to a folder on to a network drive? Or even have that option when opening a file to a network drive?

If so, I would be using this feature at my job site.

Thank you,

Use the folder dropdown in the dialog to navigate to the folder, wherever it is (local or network makes no difference). Click the Tools button in the upper right and select Add to My Places.

You can read

<http://word.mvps.org/faqs/customization/CstmzeWd2kOpenSaveDlgs.htm>, although it won't tell you much more than this.
