There is a network friendly Office – use Terminal services to run Office.

After searching google.groups.com and finding no answer, anonymous@discussions.microsoft.com asked:

| I would have expected a more network friendly version from
| Microsoft. Thanks for the information.

|

|

|| -----Original Message-----

|| No, there is only one version of Office. The license varies by what
|| you purchase. Only Enterprise or Select licensed versions of Office
|| can be run from a Terminal Server. There is no other option except
|| Terminal Server or local machine installation.

|| After searching google.groups.com and finding no answer,
|| anonymous@discussions.microsoft.com asked:

||

||| Is there a version that does not require logging on to
||| Terminal Server? We have TS and use it for our remote
||| office connection, but would prefer Office to work
||| directly off the server/ network rather than TS if
||| possible.

|||

||| Thanks!

|||

|||

||| -----Original Message-----

||| Yes, you can use an enterprise license copy on a Windows Terminal

||| Server to let users access Office.
