Same problem here.
Any ideas??

I downloaded the Beta 2 on msdn.microsoft.com, english version.
When I run the beta 2 setup, the first alert is "The language of this installation is not supported by your system".
So, there was no option for selecting an email address :-(
I extracted the files from the ISO file to my harddisk. One thing I have to mention is dat I uninstalled Office 2007 pre-release by Add/remove programs.

Re: The language of this installation is not supported by your sys

After furious head scratching, Jacob asked:

| When I install Office 2007 I get the message "The language
of this
| installation is not supported by your system". I'm running
Win XP SP2,
| English Version, .Net Framework 2.0 and the Win FX
february CTP.
| Please help me!
