Hi Frank,

Did you install the Office 2007 Enterprise Edition on the computer with Windows Vista successfully?

Sincerely,

Emily Lin,

| Hi Frank,

| I am sorry to hear that you encountered the similar problem when installing Office 2007 Enterprise Edition on the Vista client. Does the issue occur on every Vista client? Are you able to work around it by another virtual disk?

| Please extract the ISO file on the Windows XP client. And then copy all the Office 2007 installation files to the computer with Windows Vista to install Office 2007. Thus, we can see if there is problem when you extract the ISO file on the Windows Vista client.

| If possible, are you able to get different installation source files of Office 2007 instead of the ISO file to see if it is a problem of installation source files.

| Sincerely,

| Emily Lin,
