Hello Guys,

Many of you have seen my posts about this Microsoft error message that was a major problem because there wasn't anything out there to fix the problem.

So, here is the fix and what you need to do. Just so everyone knows what the exact error message is, if you get this when opening Word, Excel, or any Office product "MS Office <"Enter Office Product (Word, Excel, etc)"> has not been installed for the current user, then go to this link and follow the directions step by step.
