Please be aware that creating an autorun CD, saving the file as PPS, all of these things, do not keep users from being able to open your file and edit it in PowerPoint. Although a PPS or autorun CD will run as a presentation, it can still be opened and edited.

Just wanted to make that clear.

Hi,

I am very new at this and I can not seem to be able to burn the CD with only the slide show. It is including the entire presentation/setup. Can this be done? I would like for the person to be able to add the CD to thier drive and automatically be able to view the slide show.

Thank You,  
LRG
