

Trashed PST – Help!

Source: <http://www.tech-archive.net/Archive/Outlook/microsoft.public.outlook.general/2004-03/2479.html>

Whilst using a synchronisation utility to synch a PST on 2 machines something has gone horribly wrong. OL2K now tells me it is not a PST and/or information services must be defined prior to use. Inbox repair seems to effect a repair but on opening it there is nothing in any of the folders. The file is 305Mb

Any help / ideas gratefully received. I do have a backup but it does not contain some recent emails I need.

TIA

Jon
