Hi – make sure OE is set as your default mail program in control panel, internet options, programs.

Then note:

This is a group to support Outlook from the Office group of programs. Outlook Express is a part of Internet Explorer and is a quite different program, despite its similar name..

You will probably get a faster and more expert answer if you post this to an Outlook Express news group.

Try posting in one of these newsgroups:

microsoft.public.windows.inetexplorer.ie5.outlookexpress for OE 5.x
microsoft.public.windows.inetexplorer.ie55.outlookexpress for OE 5.5x
microsoft.public.windows.inetexplorer.ie6_outlookexpress for OE 6.x
microsoft.public.internet.outlookexpress.mac for OE for Macintosh

microsoft.public.outlook.general: Re: Outlook Express 6.0 Sending Photos Problem

If those groups aren't carried on the news server that's carrying this group try using msnews.microsoft.com (MS's public news server that's the source for all the microsoft.public newsgroups).

If you're accessing the Microsoft newsgroups through the MS Product Support Services Community Newsgroups web interface, click <http://communities.microsoft.com/newsgroups/default.asp?icp=InternetExplorer> to get to the Internet Explorer groups, then click the plus sign next to your version of IE to see the link to the Outlook Express group for that version number.

A good website for information on OE is:

<http://www.tomsterdam.com/>
