

Default font for task form being reset to Arial 12 all the time

We use Tasks here at work to keep up to date with the specific jobs we're doing. Right now we use a form and add new customer information into a new task. From there, we can click on the tasks within Outlook and add our data. The thing is, upon the initial post to the tasks group the font is a standard font set by Outlook. The annoying problem that I'm having is that when someone else looks at the task and tries to edit it, the font changes to Arial size 12. The fonts on all computers are all Arial size 10. Can anyone tell me how to fix this?
