I have O2003 and using a Combination field. Below is my format. I was hoping someone can provide a little help on this item.

When using the [Date] field, it always shows the format of using the date and time. I'd like it to show the format of "July 28, 2008" and show no time. I've tried using the Date Format function, but no luck. Using Format(Date(),"m d, yyyy") only returns the text.

My second question is while I'm in the form, if I right click on the Combination field, the "Select All" option is disabled. Is there an option to enable this item?
