Hi,

I tried also this way (see code) but I get the Automation Error.
What I can do to skip this error ? I have already certificate my macro and setted the certificate as trusted.

```
Sub mySend()  
    Dim objApp As Outlook.Application  
    Dim objInspector As Outlook.Inspector  
    Dim objItem As MailItem  
    Dim strRecipName As String  
    Dim flgErr As Integer  
    Dim ctrl As CommandBarControl  
  
    flgErr = 0  
    On Error GoTo errHandler  
    Set objApp = CreateObject("Outlook.Application")  
    Set objInspector = objApp.ActiveInspector  
    If Not TypeName(objInspector) = "Nothing" Then  
        Set objItem = objInspector.CurrentItem  
        If objItem.Class = olMail And _  
            objItem.Sent = False Then  
            objItem.Save  
            'send ===== the next line return an automation Error !!!!  
            Set ctrl = Application.ActiveInspector.CommandBars.FindControl(  
2617)                ctrl.Execute  
            End If  
        End If  
        Set objItem = Nothing  
        Set objInspector = Nothing  
        Set objApp = Nothing  
    Exit Sub  
errHandler:  
    Select Case flgErr
```

microsoft.public.outlook.program_vba: RE: How to save message before the spelling start ?

Case 1:

MsgBox "Il messaggio Ã" stato salvato ma non Ã" stato possibile eseguire il controllo ortografico", vbInformation, "Check Mail"

Case 287:

MsgBox "Mail non spedito come da vostra scelta.", vbInformation, "Check Mail"

Case Else

MsgBox "Errore : "
