Hi –

I am having this problem on several machnines, I open outlook up and click on calendar. The program freezes and goes into Not Responding mode. I have checked form viruses, worms (like sasser.. etc.), run ad-aware, spybot, Reinstalled outlook, repaired outlook but the problem comes back, I've also updated outlook...

They use hotmail within outlook and the calendar.
Basically I don't know where to go from here.

Is there any other tool that can repair this problem?

Any help would be great!

Thank,
Tony
