I have been experiencing the same problem, the default address book is set to the domain that I am in but when I try and send a message and click on the to button, only the global address book and contacts are available. The address books for my own domain and other domains within aren't available. Any ideas on how to deal with this?

>-----*Original Message*-----

>*The addressing order has been set to our organization, then Global Address Book, then contacts. There are many times when sending messages the organization address book is not listed--it defaults to Global and the organization is not available. What would cause this?*
