Hi

Getting some spam –

when looking at the spam–email using my PPC (Dell Axim 3 connected to my PC and sync'ed (including emails))

I sometimes see on the PPC that the spam–email have an attachment which is not shown in Outlook on my PC

when I open such a spam–email with the PPC the email is empty but a picture (with a lot of text) is attached 8–)

why do Outlook on my PC not warn me about the attachment?

can you tell me why it is done, what is the trick????
