Do you use IMAP?

It is beta software, so performance issues are to be expected.

hello!

i have install Office 2007 beta 2 suite, but i have many troubles with outlook.

sometimes when do the action "send and receive" program every 10 minutes, load the actions in the windows and stay in "Processing" and still there..

later, I close the outlook, but it still open in the Window Task Manager.

I use the ouylook every day in my work and house. This new version looks very well and the usability it perfect, but this problem make me think to uninstall the beta and go again with my 2003.

Please send me feedback

Juan Manuel from Argentina

pd: excuse me but my english is very basic!!!
