Hallo gentlemen

I had to fully format the hd and firstly I saved the files \*.pst.

Once rebuilt the system I've been trying to load up old emails data but till now the message I get from the application is that the file i select is not an outlook file.

I am sure that this problem is not due to a file corruption as I made several copies of the original outlook.pst on cdrom and on usb memory

Any suggestion?

Many thanks

Giamber
