Hey.

I just got 1GB on my SX66. It is an SD card. I'd like to direct my analog FM broadcast radio software, which is VCRadio by Sagebrush, to record to that card, so I can have these broadcasts with me in the tunnels of the DC Metro, where Cingular streaming and FM broadcast are unavailable..

I tried pasting \Storage Card into the Network Path dialog box but it says it's not logged on.

How can I make \Storage Card a _drive_?

I have recorded to network drives with this software before. An upgrade is coming, or may even be available in Version 1.8, which will allow on-the-fly recordings to go to a different location from scheduled recordings. It may also be possible to route specific programs to specific locations (including VPN locations), making an income opportunity for me. I'd charge to "podcast" broadcast! What a hoot!

Right now, though, I just want to make \Storage Card a drive. Sure, I can drag and drop. Big deal. I want and need it to be integrated. Sure, I can pop the card out and put it in a USB flash drive card holder. These can even be pocket sized. I'd prefer that I just dock and

Re: How to make \Storage Card a drive?

fahgeddaboutit. Verizon streaming is an option for entertainment but many local FM stations do not stream.

Later, when I get Bluetooth ActiveSync working again, I'll just have to be in the room, and the drive will be online! How cool is that?

Can the latest version of ActiveSync do this? I have version 3.8.0, Build 5004.

Well, that sounds hopeful. It certainly is an interesting site. I will download the trial now and report here. I will report any bugs to the maker. The SX66 is not listed, but the OS2 and PPC6600 are. It's the BlueAngel FCC ID, generically.

Doug
