Hi,

With ActiveSync 4.x, Microsoft does not provide the user with any control over when synchronization occurs after the device is in the cradle.

Hi

I synchronized Outlook on my PC and PDA and noticed that the sync is quite immediate from the PC to the PDA (after an Outlook change) but in the other

way is quite longer, seems a few minutes. Is there a way to change that, in

order that an change on the PDA is send to the PC nearly immediately ?

.
