:(

So nothing ever came of this then ?

Regards,
OGLES

Yep, I can verify that it is enabled..

If USB is enabled, your problem gets much more
complicated to figure out.

Oh dear – does that mean most likely it _won't_ be fixed, or is it
possible ?

Regards,
OGLES

"Gary Waliczek [MSFT]" wrote:

Can you check the connection settings page and verify that
USB

Re: WMDC Service Release

connections
are allowed for the computer you're trying to connect to.
Disabling USB
is
the easiest way to get this event log. If USB is enabled, your
problem
gets
much more complicated to figure out.

Nope, none of that happens. It is as if when I
plug the device in, that
it
hasn't been connected at all. Usully, when I
plug the device in, the
"Stand-By" option is disabled, but it doesn't
even do that..

WMDC just stays on this page (No change
whether it is connected or
not):

<http://img87.imageshack.us/my.php?image=wmdcuo4.jpg>

The only thing under Portable Devices, is
my Nokia N93, which also
works
fine..

Looked under Event Viewer though, and I
found WcesComm giving the
following
Error message 5 times: "Windows
Mobile-based device failed to connect
due
to
Start USB Connection (0x80004005) failure
(see data for failure code)."

Both Rapimgr & WcesComm had also

Re: WMDC Service Release

reported the following "Information" Messages, quite a few times: "Windows Mobile legacy device connectivity service started."

Thanks for your help,

Regards,
OGLES

"Gary Waliczek [MSFT]" wrote:

ok, well if you plug in USB then you don't need that, but can you tell me what happens? Do you get a crash in the "Windows Mobile-based device connectivity" (rapimgr) service? If not are there any event logs in the event viewer? Does the device create a node under Portable Devices in the device manager when you plug it in?

Nope..
Didn't
work.. :(

I changed
the value to
COM1, but
still

Re: WMDC Service Release

nothing's
changed.. (
Btw My
Device
connects via
USB..
should the
value not be
set to USB,
as opposed
to
COM1
?)

Anyway, if
you can just
provide me
with just
enough
information
to
be
able
to browse
my device
via
Windows
Explorer, I
will be very
grateful..

Regards,
OGLES

Have
you
seen
my
reply
to
the
post
above
this
one:

While
serial
is
not
officially
supported,
you
can
change
the
registry
value
for
"SerialPort"
to
"COM1"
or
"COM2"
etc.
Then
reboot
the
PC
and
don't
touch
the
connection
settings
page
after
that.
You
should
be
able

Re: WMDC Service Release

to
connect
and
browse
files.
Its
in
"HKLM\SOFTWARE\Microsoft\Windows
CE
Services"

It
won't
get
you
partnered
for
sync
with
a
CE
device,
but
it
gets
you
the
missing
connection
type.

Yes,
proper
support
for
Windows
CE.
As
far
as
I
know,
it
isn't
supported
in
the
current
version,
and
I
need
it
very
urgently.
The
primary
purpose
of
my
PC,
is
just
to
use
to
develop
for
a
Win
CE
4.2
.NET
Device,
with
VS
05,
and
if

Re: WMDC Service Release

I
can't
get
it
to
connect
properly...
then
I
'm
thinking
of
reverting
back
to
XP..

All
I
need
to
know
is
if
it's
going
to
be
a
long
time
till
this
feature
is
going
to
be
added,
so
I
can
know
whether
the
downgrade
is
going
to
be
feasible

Re: WMDC Service Release

Hi,

May
I
ask
when
the
next
Service
Release
for
WMDC
is
planned
to
be
released
?

Regards,
OGLES
